United Nations Commission on the Status of Women
CSWNGO Panel Event 4:30pm: We Rise! We Rise! We Rise Together!
Venue: 4 W 43rd Street, Room: Social Hall

Women's Marches were virtually instigated and individually responded to becoming the largest resistance demonstration in history. Women as individuals and as a gender are rising and empowering each other in circles, marches and conferences. Together women have the potential of moving humanity toward an evolutionary egalitarian era in human history. A **UN Fifth World Conference on Women (5WCW)** would accelerate this through role modeling, information, and inspiration. Women and girls together and individually are the only force that can change the hearts and minds of men whose psychology and politics are moving humanity toward a new Dark Age.
